Secure Internet Access Node from DATAGROUP

01.12.2023

SIAN - CERTIFICATE OF CONFORMITY TO THE CISS ITS

DATAGROUP has received a certificate from the State Service for Special Communications and Information Protection of Ukraine and guarantees its customers a high level of Internet access node protection. The operator's comprehensive information security system is confirmed by the Certificate of Conformity of the CISS ITS of the secure Internet access node, which meets the requirements of the regulatory documents governing technical information security in Ukraine. In accordance with the National Security and Defence Council's requirements, state-owned bodies, enterprises, institutions, and organisations are prohibited from entering into contracts and purchasing Internet access services from electronic communication service providers that do not have documents confirming that their information security system meets the established information security requirements.

ISO/IEC 27001 CERTIFICATE

DATAGROUP has a certificate of compliance with ISO 27001, which confirms that the company's information security management system (ISMS) meets all the requirements of the international standard ISO/IEC 27001:2013 in the following areas of activity:

- managing information assets in terms of providing cloud services to customers,

- providing access to the Internet and communication channels,

- providing contact centre services, software development and support.

Compliance with the requirements of ISO 27001 guarantees effective management and confirms the high quality of services provided to ensure the confidentiality, integrity and availability of information. This is especially important for customers of various telecommunications and IT services that work with personal data, including banks.
